Other Authors: Yu, Hyeong Gon

Responsibility: Hyeong Gon Yu, editor

Place of Publication: Singapore

Publisher: Springer

Date of Publication: c2020

Physical Description: 1 online resource (vii, 220 p.) : 240 illus., 192 illus. in color

Series Vol.: 5

Series Title: Retina atlas

ISBN: 9789811385469
9789811385452 (Print ed.)
9789811385476 (Print ed.)
9789811385483 (Print ed.)

ISSN: 2662-5741

Subjects (MeSH): Eye Infections
Inflammation

Specialty: Infectious Disease Medicine
Ophthalmology

Abstract: This atlas covers most ocular inflammatory and infectious diseases of importance with clinical significance. It includes chapters on non-infectious diseases and chapters on infectious diseases. For each chapter, essential information regarding the clinical features, diagnosis, and management is described in the text based on the up-to-date knowledge, and more than 240 carefully selected photographs are provided. World-famous experts in this field have included as many as valuable photographs of patients as possible. New imaging tests of ultra-wide field retinal images and high-resolution optical coherence tomography are included in addition to conventional fundus photos and fluorescein angiographs. Especially, chapters on infectious diseases provide invaluable photos of rare but clinically important diseases. Designed to assist in the diagnosis and treatment of ocular inflammation and infection, this book is meant for the retina specialist, researchers of ocular inflammation, general ophthalmologist, resident and retina fellow. Inflammatory and Infectious Ocular Disorders atlas is one of the nine volumes of the series Retina Atlas. This series provides global perspective on vitreoretinal diseases, covering imaging basics, retinal vascular disease, macular disorders, ocular inflammatory and infectious disorders, retinal degeneration, surgical retina, ocular oncology, pediatric retina and trauma. This comprehensive atlas is spread over 9 volumes and about 100 chapters, covering validated and comprehensive information on retinal disorders.

Contents:	Acute posterior multifocal placoid pigment epitheliopathy – Serpiginous choroiditis – Punctate inner choroidopathy – Multifocal choroiditis with panuveitis – Multiple evanescent white dot syndrome – Acute zonal occult outer retinopathy – Birdshot retinochoroidopathy – Sympathetic ophthalmia – Vogt-Koyanagi-Harada disease – Intermediate uveitis – Sarcoidosis – Behcet disease – Systemic lupus erythematosus – Posterior scleritis – Autoimmune retinopathy – Ocular tuberculosis 1 – Ocular tuberculosis 2 – Cat-scratch disease – Retinal and optic nerve involvement in syphilis – Leptospirosis – Fungal diseases – Toxoplasmosis – Toxocariasis – Ocular cysticercosis – Diffuse unilateral subacute neuroretinitis – Human immunodeficiency virus infection and cytomegalovirus retinitis – Acute retinal necrosis and progressive outer retinal necrosis.
