Subjects (MeSH): Aging
Menopause - physiology
Menstruation Disturbances - physiopathology
Primary Ovarian Insufficiency - therapy
Reproductive Health

Abstract: This volume represents an up-to-date overview on ovarian functions and reproduction, providing the reader with the latest advance in gynecological endocrinology. It is published within the International Society of Gynecological Endocrinology (ISGE) Series, and is based on the 2015 International School of Gynecological and Reproductive Endocrinology Winter Course. The book covers a very wide range of topics with particular focus on ovulation and assisted reproduction, ovarian aging and fertility, and premature ovarian failure. The volume will be an invaluable tool for gynecologists, endocrinologists, obstetrician, and experts in women's health.

Contents: Part I. From Ovulation to Assisted Reproduction: New Insight and Strategies – Part II. AMH, Ovarian Ageing and Premature Ovarian Insufficiency Fertility – Part III. Gynecological Neuroendocrinology – Part IV. PCO, Metabolism, Vitamin D, Myoma and Endometriosis – Part V. Menopause and Ageing – Part VI. Hormone Therapies: What New?
