Subjects (MeSH): Anaphylaxis

Specialty: Allergy and Immunology
Emergency Medicine

Abstract: This book offers a handy reference guide to anaphylaxis, including diagnosis and treatment. It covers food, drug allergy and venom allergies, allergic rhinitis and asthma, anaphylaxis related to intravenous drug administration, exercise-induced anaphylaxis, latex allergy, idiopathic anaphylaxis, and also discusses applied treatment modalities that cause anaphylaxis, such as various forms of immunotherapy. Providing detailed information on three recently launched epinephrine auto-injectors, this guide is an invaluable tool for otorhinolaryngologists, pediatric and adult allergologists, pulmonologists general practitioners and emergency physicians as well as patients.

Contents: Anaphylaxis: Definition, History And Epidemiology – The Etiology of Anaphylaxis – Pathophysiology of Anaphylaxis – Risk Factors for Anaphylaxis – Symptoms and Findings for Anaphylaxis – Diagnosis and Laboratory Tests for Anaphylaxis – Differential Diagnosis for Anaphylaxis – Treatment of Anaphylaxis – Communication Strategies with Anaphylactic Patients and Their Families.
