- Responsibility: Andrea Natale, Paul J. Wang, Amin Al-Ahmad, N. A. Mark Estes, editors
- Edition: Second edition
- Place of Publication: Cham
- Publisher: Springer
- Date of Publication: c2020
- Physical Description: 1 online resource (xxx, 714 p.) : 458 illus., 345 illus. in color
- ISBN: 9783030285333
9783030285319 (Print ed.)
9783030285326 (Print ed.)
- Subjects (MeSH): Arrhythmias, Cardiac - diagnosis
Arrhythmias, Cardiac - therapy
Electrocardiography
Electrophysiologic Techniques, Cardiac
Heart - physiology
- Specialty: Cardiology
- Abstract: While there are many outstanding resources providing in-depth review of electrophysiology topics, this extensively updated book is one of the few case-based books that comprehensively cover clinical electrophysiology, devices and ablation. Case review offers a simple, yet effective way in teaching important concepts, offering insight into both the basic pathophysiology of a problem as well as the clinical reasoning that leads to a solution. As the field of cardiac electrophysiology evolves, the challenge remains to educate new generations of cardiac electrophysiologists with the basics as well as the latest advances in the field. Cardiac Electrophysiology: Clinical Case Review collates the most comprehensive case-based reviews of electrophysiology designed to appeal to all students of the field whether they are fellows, allied professionals or practicing electrophysiologists. The Editors have recruited some of the true experts in the field to contribute cases that they have encountered and summarizing the important learning objectives in a succinct way. Covering clinical electrophysiology, device troubleshooting and analysis as well as intracardiac electrogram analysis and ablation, readers will find the cases useful as a review of electrophysiology or in their day to day interactions with patients.
- Contents: Part I. Clinical Cases: Ventricular Arrhythmias – Part II. Clinical Cases: Syncope – Part III. Clinical Cases: Hypertrophic Cardiomyopathy – Part IV. Clinical Cases: Athletes and Arrhythmias – Part V. Clinical Cases: Atrial Fibrillation – Part VI. Clinical Cases: Arrhythmias–Genetic Abnormalities – Part VII. Ablation Cases: Supraventricular Tachycardia - - Part VIII. Ablation Cases: Atrial Fibrillation and Flutter – Part IX. Ablation Cases: Ventricular Arrhythmias – Part X. Devices Cases.

Format: e-Book
Publication Type: Case Reports
