Place of Publication: Halifax, NS

Publisher: IWK Health Centre

Date of Publication: 2020

Format: Pamphlet

Language: English

Physical Description: 1 electronic document : digital, PDF file

Subjects (MeSH): Hospitalization
Inpatients - psychology
Psychology, Child

Subjects (LCSH): Child psychology
Children--Hospital care
Hospital patients--Psychology

Abstract: The Hematology, Oncology and Nephrology service at the IWK recognizes that the journey of a life-threatening illness is a hard one, with many challenges and adjustments along the way. Because of this, the team has an 'End of Treatment' bell. The bell is there for children and youth to ring at milestone moments. Ringing the bell means that a child or youth has finished their course of treatment and is ready for the next chapter of their life.

Responsibility: IWK Hematology / Oncology, Halifax, NS

Fertility Preservation in Children and Youth to Receive Cancer Therapy or Hematopoietic Stem Cell Transplant

<https://libcat.nshealth.ca/en/permalink/chpams37253>

Available Online: View Pamphlet

Corporate Author: IWK. Hematology / Oncology

Alternate Title: About Hematopoietic Stem Cell Transplant and cancer treatments' impact on fertility. Options to consider.

Place of Publication: Halifax, NS

Publisher: IWK Health Centre

Date of Publication: 2019

Format: Pamphlet

Language: English

Physical Description: 1 electronic document : digital, PDF file

Subjects (MeSH): Adolescent
Child
Fertility Preservation
Neoplasms - complications

Subjects (LCSH): Cancer--Complications
Children--Health and hygiene
Fertility, Human
Teenagers--Health and hygiene

Abstract: There are ways to protect fertility in children and adolescence requiring cancer therapy or a HSCT. The use of each option will depend on your child's age, how soon cancer treatment needs to begin, other medical concerns, your personal values and beliefs, and cost.

Responsibility: IWK Hematology / Oncology, Halifax, NS

Abstract: Le service d'hématologie, d'oncologie et de néphrologie du IWK sait que le cheminement pour traiter une maladie extrêmement grave est difficile. Il y a de nombreux défis à relever et ajustements à faire durant ce cheminement. C'est pour cette raison que le service a une cloche de fin de traitement. La cloche est là pour que les enfants et les jeunes la fassent sonner lors de moments marquants. Sonner la cloche signifie qu'un enfant ou un jeune a fini sa série de traitements et qu'il est prêt à entreprendre une nouvelle étape de sa vie. / The Hematology, Oncology and Nephrology service at the IWK recognizes that the journey of a life-threatening illness is a hard one, with many challenges and adjustments along the way.
