

CT scan

<https://libcat.nshealth.ca/en/permalink/chpams34178>

Available Online: View Pamphlet

Corporate Author: Nova Scotia Health Authority. CT Service Advisory Provincial Committee

Alternate Title: Computerized tomography scan

Place of Publication: Halifax, NS

Publisher: Nova Scotia Health Authority

Date of Publication: 2020

Format: Pamphlet

Language: English

Physical Description: 1 electronic document ([6] p.) : digital, PDF file

Subjects (MeSH): Tomography, X-Ray Computed
Tomography, Emission-Computed

Subjects (LCSH): Radiography, Medical
Tomography

Abstract: Computed Tomography (CT) scans are images made by a computer and X-ray machine. CT scans give more detailed pictures of bones and soft tissue organs than regular X-rays. These images will help your doctor recommend the best treatment for you. Topics include: how you get ready for the scan, what happens during the scan, questions about breastfeeding after the scan, side effects, how long it will take, when to expect results, and where to send your feedback. A list of hospital contact info is provided. The French translation of this pamphlet 1104, "Tomodensitogramme" is also available.

Notes: Previous title: CT Scanner

Responsibility: Prepared by: CT Service Advisory Provincial Committee

Pamphlet Number: 0067

Abstract: Les tomodensitogrammes sont des images prises par un ordinateur et un appareil à rayons X. Ils permettent d'obtenir des images plus détaillées des os et des organes de tissus mous que les radiographies ordinaires. Ces images aideront votre médecin à vous recommander le meilleur traitement. Les sujets abordés dans la présente publication sont les suivants : la préparation au tomodensitogramme, la procédure, l'allaitement après le tomodensitogramme, les effets secondaires, la durée de la procédure, le temps nécessaire à l'obtention des résultats, l'envoi de commentaires et suggestions. Une liste des noms des hôpitaux et de leur numéro de téléphone est fournie.

This is a French translation of the English pamphlet 0067, "CT Scan". Computed Tomography (CT) scans are images made by a computer and X-ray machine. CT scans give more detailed pictures of bones and soft tissue organs than regular X-rays. These images will help your doctor recommend the best treatment for you. Topics include: how you get ready for the scan, what happens during the scan, questions about breastfeeding after the scan, side effects, how long it will take, when to expect results, and where to send your feedback. A list of hospital contact info is provided.
