## After pregnancy loss

<https://libcat.nshealth.ca/en/permalink/chpams37591>

Available Online: View Pamphlet

Corporate Author: Nova Scotia Health Authority. Emergency Services

Alternate Title: After miscarriage

Place of Publication: Halifax, NS

Publisher: Nova Scotia Health Authority

Date of Publication: 2022

Format: Pamphlet

Language: English

Physical Description: 1 electronic document (8 p.) : digital, PDF file

Subjects (MeSH): Abortion, Spontaneous  
Hydatidiform Mole  
Pregnancy, Ectopic

Subjects (LCSH): Miscarriage  
Molar pregnancy  
Ectopic pregnancy

Abstract: After pregnancy loss, you may experience grief and many other emotions. You may have questions about the reason for your loss. This is normal. Often, health care providers do not know exactly why pregnancy loss happens. This pamphlet includes basic information about pregnancy loss such as: types of pregnancy loss, pain and bleeding, when to expect your next period, a list of symptoms to watch for, tiredness, when to expect your breasts to go back to normal, going back to work, follow-up appointments, and remembering your baby. Information about how long to wait before trying again, how to get ready for your next pregnancy, and what to do if you are scared of having another pregnancy loss are discussed. Common feelings you and your partner may have are provided. A list of local resources are provided if you wish to seek extra support in your community.

Responsibility: Prepared by: Emergency Services, adapted from PL-0918 with permission of IWK Health, Halifax, NS

Pamphlet Number: 2288

## After your procedure

## Fausse couche : hôpital régional de Yarmouth

<https://libcat.nshealth.ca/en/permalink/chpams37518>

- Available Online: View Pamphlet
- Corporate Author: Nova Scotia Health Authority. Yarmouth Regional Hospital. Women and Children's Health Unit
- Place of Publication: Halifax, NS
- Publisher: Nova Scotia Health Authority
- Date of Publication: 2019
- Format: Pamphlet
- Language: French
- Physical Description: 1 electronic document (9 p.) : digital, PDF file
- Subjects (MeSH): Abortion, Spontaneous  
Hydatidiform Mole  
Pregnancy, Ectopic
- Subjects (LCSH): Miscarriage  
Molar pregnancy  
Ectopic pregnancy
- Abstract: Il n'y a pas de « bonne » façon de se sentir après une fausse couche. Certaines femmes s'en remettent rapidement, tandis que d'autres prennent du temps à récupérer. Certaines réagissent bien sur le coup, mais ont de la peine plus tard. Vous n'êtes pas la seule à vivre cette terrible expérience. Environ une grossesse sur quatre se termine en fausse couche, et nous ne savons pas toujours pourquoi. Ce n'est pas ce que vous avez fait ou n'avez pas fait qui a causé votre fausse couche. Ce dépliant répond à quelques questions courantes et explique ce à quoi on peut s'attendre lorsqu'on fait une fausse couche. Il indique les symptômes qui nécessitent un suivi à l'urgence et donne de l'information sur les ressources qui sont disponibles dans la collectivité.
- This pamphlet is a French translation of "Miscarriage: Yarmouth Regional Hospital" pamphlet 2009. There is no "right" way to feel after a miscarriage. Some women may recover quickly, while others take a long time. Some may cope well at the time, but find the pain of their loss hits them later. You are not alone in this terrible experience. About 1 in 4 pregnancies ends in miscarriage, and we don't always know why. Nothing you did or didn't do is likely to have caused the miscarriage. This pamphlet answers some common questions you may have and describes what to expect if you experience pregnancy loss. A list of symptoms that need followup at the nearest Emergency Department is listed. A list of local resources are provided if you wish to seek extra support in your community.
- Responsibility: adapted with permission from: "Your Miscarriage," The Miscarriage Association, UK ; adapted by: Women and Children's Health Unit, Yarmouth Regional Hospital

Subjects (MeSH): Abortion, Habitual  
Embryo Loss  
Fetal Death

Abstract:	Providing the latest evidence-based information on etiology, evaluation and treatment, this unique text provides an in-depth, comprehensive discussion of the epidemiology, genetic and endocrinologic factors and medical and surgical management of recurrent pregnancy loss (RPL). Taking a multidisciplinary approach including psychological treatment and patient perspectives, all aspects of current RPL prevention and treatment are elucidated. Detailed chapters provide real-world illustrative material and cover the set-up and management of RPL clinics and databases, containing practical tips. Recurrent Pregnancy Loss will be an excellent resource for OB-GYN specialists, general and reproductive endocrinologists, radiologists, hematologists, psychiatrists, psychologists, and any other investigators or clinicians treating patients confronted with this emotionally and physically trying condition.
Contents:	Part I: Introduction to Recurrent Pregnancy Loss – Recurrent pregnancy loss: definitions, epidemiology, and prognosis – Implantation, physiology of placentation – Part II: Causes of Recurrent Pregnancy Loss – Endocrine abnormalities in RPL – Genetics of recurrent pregnancy loss – Inherited and acquired thrombophilias and adverse pregnancy outcomes – Immunological causes of recurrent pregnancy loss – Anatomical aspects in recurrent pregnancy loss – Male factors in recurrent pregnancy loss – Lifestyle and RPL – The common characteristics between Infertility and recurrent pregnancy loss – Part III: Management of Recurrent Pregnancy Loss – Contemporary Prevention and treatment of recurrent pregnancy loss – Part IV: Psychological and Supporting Aspects of Recurrent Pregnancy Loss – The healthcare giver's perspective: The importance of emotional support for women with recurrent RPL – A patient's perspective – Part V: The Future – New frontiers in RPL research and treatment.
