Children--Hospital care
Hospital patients--Psychology

Abstract: The Hematology, Oncology and Nephrology service at the IWK recognizes that the journey of a life-threatening illness is a hard one, with many challenges and adjustments along the way. Because of this, the team has an 'End of Treatment' bell. The bell is there for children and youth to ring at milestone moments. Ringing the bell means that a child or youth has finished their course of treatment and is ready for the next chapter of their life.
