Critical Care - psychology

Subjects (LCSH): Hospice care
Intensive care units

Specialty: Palliative Care

Abstract: The goal of the 3 Wishes Project is to improve the end-of-life experience for patients in the Intensive Care Unit (ICU) and their loved ones. This pamphlet lists what the team helps with and provides examples of some of the wishes made by patients and their loved ones. It also describes where the program started and which organizations support the program. Contact information is provided.

Responsibility: Prepared by: The 3 Wishes Project staff, QEII

Professional-Family Relations
Specialty: Family Health
Intensive Care Units

Abstract:	This text is one of the first comprehensive resources on understanding and working with families in the intensive care unit. The text provides a conceptual overview of the Family ICU Syndrome, a constellation of physical morbidity, psychopathology, cognitive deficits, and conflict. Outlining its mechanisms, the book presents a guide to combating the syndrome with an interdisciplinary team. The text represents the full array of the interdisciplinary team by also spotlighting administrative considerations for health care management and approaches to training different members of the health care team. Family voices are featured prominently in the text as well. The book also addresses the complete trajectory of needs of care, including survivorship and end-of-life care. Written by experts in the field, <i>Families in the Intensive Care Unit: A Guide to Understanding, Engaging and Supporting at the Bedside</i> is a state-of-the-art reference for all clinicians who work with families in the ICU.
Contents:	1. An Introduction and Overview of Why Families Matter in the Intensive Care Unit – 2. Family Voices from the Intensive Care Unit – 3. Cognitive Barriers to Effective Surrogate Decision-Making – 4. Emotional Processing/Psychological Morbidity in the ICU – 5. Family Psychological Morbidity After the Intensive Care Unit – 6. Sleep and Sleep Deprivation Among Families in the ICU – 7. Taking the Lead: Changing the Experience of Family ICU Syndrome by Changing the Organization of Care – 8. Unique Challenges for Family Members of Patients with Acute and Chronic Critical Illness: The Older Caregiver – 9. Family Support and ICU Survivorship: Lessons Learned from the Pediatric Critical Care Experience – 10. Life After the ICU: Post-intensive Care Syndrome in Family Members – 11. Humanizing Intensive Care: Questions, Balance, and Tragic Trade-Offs – 12. Intensive Care Unit Conflicts and the Family – 13. Identifying, Analyzing, and Combating Family Intensive Care Unit Syndrome in Long-Term Acute Care Hospitals – 14. Personalized Interventions to Support Families in the Intensive Care Unit – 15. Family-Centered Care Interventions to Minimize Family Intensive Care Unit Syndrome and Post-intensive Care Syndrome-Family – 16. Strategies to Facilitate Communication with Families in the ICU – 17. End-of-Life Care – 18. The Integrative Approach to Supporting Families in the ICU – 19. The Role of Ethics Consultation in Enhancing Family-Centered Care – 20. Family Role in Patient Safety in the Intensive Care Unit – 21. Family and Patient Spiritual Narratives in the ICU: Bridging Disclosures through Compassion – 22. The Role of the Pharmacist in Family Engagement in the Intensive Care Unit and During Transitions of Care – 23. Respiratory Therapy and Family Engagement in the Intensive Care Unit – 24. The Role of the ICU Social Worker in Supporting Families – 25. Rehabilitation – 26. Training Providers in Family-Centered Care – 27. Child Life in the Adult ICU: Including the Youngest Members of the Family – 28. How to Study the Family ICU Syndrome: A Basic Approach to Research Methodology.
