Subjects (MeSH): Gastroscopy
Gastrointestinal Diseases - diagnosis

Subjects (LCSH): Gastroscopy
Gastrointestinal system--Diseases--Diagnosis

Abstract: This is an Arabic translation of the English pamphlet 0040. A gastroscopy is an exam of the esophagus (throat), stomach, and duodenum (the first part of the small bowel). We have described getting ready for the test, how it is done, care after the test, and possible complications. If sedation is given, you must not do certain activities for 24 hours after the test.

Responsibility: Prepared by: GI Unit, QEII
