Gynecology

Abstract:	This book offers a comprehensive and clinically relevant survey of adolescent gynecology. Adolescent Gynecology: A Clinical Casebook addresses the many intersecting considerations of gynecologic and reproductive health care for this population using a concise, case-based format. Organized in four sections, the first introduces chapters on adolescent confidentiality, puberty, and well care. Section II covers varied menstrual disorders, while Section III highlights issues in reproductive health care including sexually transmitted infection and adolescent pregnancy. Finally, Section IV addresses special populations of adolescents, including chapters on girls who have sex with girls, girls who are victims of abuse and girls with special health care needs and chronic health conditions. In each section common gynecologic health issues are discussed in the context of these clinical cases, provide the knowledge needed to further improve comprehensive care of adolescent patients. Adolescent Gynecology: A Clinical Casebook is a unique resource that delivers essential clinical information for Adolescent Medicine and Pediatric and Adolescent Gynecology fellowship trainees, as well as for medical students, resident trainees, and primary care practitioners who are the front-line caregivers for adolescent girls.
Contents:	Part I: General and Developmental Approach to Adolescents – 1. Case of a Girl with a Secret – 2. Case of a Girl Due for HPV Immunization – 3. Case of a Girl with Delayed Puberty and Inflammatory Bowel Disease – 4. Case of a Girl with Vulvar Swelling – 5. Case of a Girl with an Ovarian Cyst and Abdominal Pain – Part II: Menstrual Disorders – 6. Case of a Girl with Irregular Periods, Acne and Hirsutism – 7. Case of a Girl with Painful Periods, Pain with Bowel Movements and Dyspareunia – 8. Case of a girl with heavy, prolonged periods and anemia – 9. Case of a girl with irritability and mood swings with her periods – 10. Case of a girl with secondary amenorrhea and an eating disorder – 11. Case of a Girl with Primary Amenorrhea, Cyclic Pelvic Pain, and Absent Vagina – 12. Case of a Girl with Primary Amenorrhea, Delayed Puberty and High Gonadotropin levels – Part III: Sexually Active Adolescents – 13. Case of a Girl with Vaginal Discharge Who Has Sex with Boys – 14. Case of a Girl with Vaginal Discharge Who Has Sex with Girls – 15. Case of a Girl with Lower Abdominal Pain – 16. Case of a Girl with Vulvar Ulcers – 17. Case of a Girl with a Positive Pregnancy Test – 18. Case of a Girl Seeking Birth Control – 19. Case of a Girl with Condom Failure – 20. Case of a Girl with Obesity Seeking Birth Control – 21. Case of a Girl on Psychotropic Medications Seeking Birth Control – Part IV: Special Populations of Adolescents – 22. Case of a Sexually Active Girl with Immune Compromise on Teratogenic Medications – 23. Case of a Girl Seeking Fertility Counseling – 24. Case of Girl with Special Needs Seeking Menstrual Management – 25. Case of a Girl with Chronic Abdominal Pain, Frequent Emergency Room Visits and Opioid Abuse.

Abstract: This volume is an up-to-date resource on the international state-of-the-art in the diagnosis and management of ovarian cancer. While this devastating disease has been considered mainly a disease of the Western hemisphere, the book moves beyond our conventional understanding and embraces knowledge from around the world. It focuses on recent advances in diagnosis, including genetic screening; improvements and expanded choices in management, such as gene therapy and the optimization of chemotherapeutic agents; and the latest laparoscopic and robotic surgical techniques. Further chapters address histopathologic features of this disease, and related psychosocial and quality-of-life-issues.

Contents: 1. Epidemiology of Ovarian Cancer: An Update – 2. Genetic Risks of Ovarian Cancer – 3. Ovarian Cancer Screening and Early Detection – 4. Surface Epithelial Tumours of the Ovary – 5. Pathology of Non-epithelial Malignancies of the Ovary – 6. Strategies for the Management of Ovarian Cancer – 7. Management of Hereditary Ovarian–Breast Cancer – 8. Ovarian Cancer in the Pediatric Population – 9. Management of Patients with Early-Stage Ovarian Cancer – 10. Treatment of Advanced Stage Ovarian Cancer – 11. Diagnosis and Management of Epithelial Ovarian Cancer with Peritoneal Metastases – 12. Targeted Molecular Therapy for Patients with Ovarian Cancer – 13. Psychological Aspects of Hereditary and Non-hereditary Ovarian Cancer – 14. Quality of Life in Patients with Ovarian Cancer.

Subjects (MeSH): Ambulatory Care
Genital Diseases, Female

Specialty: Gynecology

Abstract: There are approximately 55,000 practicing ob/gyns in the United States. The obstetrics and gynecology residency training authority (the Accreditation Council for Graduate Medical Education) has now pushed ambulatory primary and preventative care to the top of its list for residency training. Interest in the area of ambulatory gynecology is not just growing in the field of ob/gyn, however; family and primary care practitioners, emergency room physicians, and advance practice nurses all must know how to diagnose, manage, and treat gynecological conditions. Since office technology has expanded and decision-making has become increasingly complex, physicians need a guide through the endless list of treatment options for commonly presenting gynecologic disorders. *Ambulatory Gynecology* gives practitioners tools for diagnosis, investigation and management of these disorders, including decision-making algorithms. The text is evidence-based. From endocrine disorders to breast disease, preventative measures for osteoporosis to management of an abnormal pap smear, from adolescent gynecology to menopause, this book is crucial for office-based physicians to feel confident practicing in all areas of gynecology.

Subjects (LCSH): Clitoris
Clitoris - Surgery
Gynecology
Obstetrics/Perinatology

Abstract: This eagerly awaited book offers a unique, comprehensive scientific study of the anatomy of the organ of female sexual pleasure. The authors use macroscopic and microscopic research to guide the reader from the glans, the visible part of the clitoris, where they explore the impressive sensory corpuscles, to the hidden roots of the bulbo-clitoral organ. They show its complexity, its exact location within the external genitalia and its intimate relationship with the urethro-vaginal pyramid. They also remind us that throughout history there has been a failure to understand this organ, and explain that this misunderstanding remains the cause of persistent excisions, criminal mutilating practices that have not yet been eradicated. Using extensive iconography, they demonstrate throughout this book that the bulbo-clitoral organ is an exceptional natural treasure that every woman possesses and that every man should know well.

Contents: History of the Clitoris – Formation of the Clitoris – Terminology and Related Difficulties – External Morphology of the Clitoris – Structure of the Bulbo-clitoral Organ – Microscopic Study of the Bulbo-clitoral Organ – Physiology of Cavernous and Spongy Tissues – Innervation of the Bulbo-clitoral Organ – Sensory Corpuscles – The Vessels of the Bulbo-clitoral Organ – Muscles of the Bulbo-clitoral Organ – The Suspensory Ligament of the Clitoris – Relationships of the Bulbo-clitoral Organ – Imagery of the Bulbo-clitoral Organ – The Bulbo-clitoral Organ in the Sexual Act – Mutilations of the Clitoris – The Clitoris in Art.
