Subjects (LCSH): Child psychology
Children--Hospital care
Hospital patients--Psychology

Abstract: The Hematology, Oncology and Nephrology service at the IWK recognizes that the journey of a life-threatening illness is a hard one, with many challenges and adjustments along the way. Because of this, the team has an 'End of Treatment' bell. The bell is there for children and youth to ring at milestone moments. Ringing the bell means that a child or youth has finished their course of treatment and is ready for the next chapter of their life.

Hospitalization

Statistics as Topic

Abstract: This comprehensive resource is designed to explain how statistics are computed and applied in health care settings. The hands-on method requires you to think through a problem and choose the appropriate data to apply. Detailed examples and numerous practice opportunities present a step-by-step learning path that encourages mastery of concepts.

Subjects (MeSH): Hospitalization
Preoperative Care
Postoperative Care

Subjects (LCSH): Hospital patients
Preoperative care
Postoperative care

Abstract: This pamphlet provides information about your care before and after surgery. Topics about preparing for surgery include: time of surgery, possible delays, what to bring, medicines, anesthetic, health and hygiene, smoking, alcohol, personal items, and what to expect in the operating room. After surgery we have described: recovery area, pain control, nausea, dressings, bowel and bladder functions, eating and drinking. In the hospital we have described: deep breathing and coughing exercises, using an incentive spirometer, leg exercises, getting out of bed safely, and visitors. Topics about going home include: getting ready to go home, nutrition, care of your incision, instructions for bleeding and symptoms that require medical attention.

Abstract: Le service d'hématologie, d'oncologie et de néphrologie du IWK sait que le cheminement pour traiter une maladie extrêmement grave est difficile. Il y a de nombreux défis à relever et ajustements à faire durant ce cheminement. C'est pour cette raison que le service a une cloche de fin de traitement. La cloche est là pour que les enfants et les jeunes la fassent sonner lors de moments marquants. Sonner la cloche signifie qu'un enfant ou un jeune a fini sa série de traitements et qu'il est prêt à entreprendre une nouvelle étape de sa vie. / The Hematology, Oncology and Nephrology service at the IWK recognizes that the journey of a life-threatening illness is a hard one, with many challenges and adjustments along the way. Subjects (LCSH):	<p>Psychiatric consultation</p> <p>Patients - Mental health</p> <p>Sick - Psychology</p> <p>Mental Disorders</p> <p>Hospitalization</p> <p>Patients - psychology</p> <p>Psychology, Medical</p> <p>Referral and Consultation</p>
Abstract:	<p>Massachusetts General Hospital Handbook of General Hospital Psychiatry, by Theodore A. Stern, Gregory L. Fricchione, Ned H. Cassem, Michael Jellinek, and Jerrold F. Rosenbaum, is your ideal source of guidance on consultation-liaison psychiatry! Experts from the Massachusetts General Hospital-widely respected as one of the world's premier psychiatric institutions-provide practical advice on the diagnosis and treatment of psychiatric issues experienced by in-hospital, medically ill adults and children. This compact resource reads like a handbook, but delivers all the details youd expect from a textbook. Understand and manage the psychological impact of chronic medical problems, life-threatening diseases, disfigurement, and more. Effectively manage difficult patients, including those with hypochondriacal and conversion disorders</p>

Abstract:	<p>This book provides a road map for defining the care of acute heart failure (HF) patients in the short stay or observation unit setting. Supported by the Society of Cardiovascular Patient Care, it presents a description of the problem, defines the measures of success, elucidates the implementation of interventions required to be successful, and provides the tools to insure quality HF management. Fully updated and revised, the Third Edition discusses administrative and regulatory issues relating to HF management; pathophysiology and demographics of acute HF; emergency medical services and emergency department assessment and treatment of acute HF; admission, treatment, and disposition of acute heart failure in observation units; complications and future research; and resources such as clinical pathways, algorithms, and patient education tools that can be directly utilized in various healthcare settings. Short Stay Management of Acute Heart Failure, Third Edition, is an essential guide for cardiologists, emergency physicians, and hospital administrators, as well as for institutions wishing to be recognized as quality heart failure centers.</p>
Contents:	<p>Part I: Administrative and Regulatory Issues – Society of Cardiovascular Patient Care's Acute Heart Failure Accreditation – The Economics and Reimbursement of Acute Heart Failure – Regulatory Requirements in Acute Heart Failure – Quality and Operational Metrics in Heart Failure – Staffing and Facilities Requirements for Short Stay Unit Acute Heart Failure Management – Part II: Pathophysiology and Demographics – Pathophysiology of Acute Decompensated Heart Failure – Acute Heart Failure: Epidemiology and Demographics – Part III: EMS/Emergency Department Assessment and Treatment – Pre-hospital Management of Acute Heart Failure – Dyspnea Assessment and Airway Management in Acute Heart Failure Patients – Volume Assessment in the Emergency Department – Diagnostic and Prognostic Biomarkers in Emergency Department Acute Heart Failure – Bedside Ultrasound in the Evaluation and Management of Acute Heart Failure – Emergency Department Therapy of Acute Heart Failure – Part IV: Short Stay Unit: Admission, Treatment, and Disposition – Short Stay Unit Admission Inclusion and Exclusion Criteria – Essentials of Patient Education in the Emergency Department and Short Stay Unit – Emergency Department and Short Stay Unit Acute Heart Failure Discharge Criteria – Effective Discharge Planning For Acute Heart Failure in the Short Stay Unit – Drugs that Should Not be Used in the Management of Acute Heart Failure – Errors to Avoid in Acute Heart Failure Care – Chronic Heart Failure Management: Drugs Recommended for Routine Use – Implantable Cardiac Devices in the Short Stay Management of Acute Heart Failure – Implications of Atrial Fibrillation in Acute Heart Failure Management – Controversies in Acute Heart Failure Management – Acute Heart Failure Research in the Emergency Department and Short Stay Unit – Part V: Resources – Clinical Pathways/Algorithms – Patient Education Tools – Discharge Instructions.</p>

Responsibility: W. Frank Peacock, Carol L. Clark, editors

Place of Publication: Cham

Publisher: Springer International Publishing : Imprint: Humana Press

Date of Publication: c2016

Physical Description: 1 online resource (xiv, 289 p. : 40 illus., 24 illus. in color)

Series Title: Contemporary cardiology

ISBN: 9783319313863
9783319313849 (print ed.)

ISSN: 2196-8969

Subjects (MeSH): Atrial Fibrillation - therapy
Disease Management
Hospitalization - trends

Abstract: This book provides a road map for the efficient and successful management of atrial fibrillation (AF) in the short stay unit. It describes the problem, defines the measures of successful treatment, elucidates interventions, and supplies the tools for achieving quality care. Organized in four parts, it covers the impact of AF on patient populations; the presentation and management of AF; the transition to the outpatient environment; and systems management. Topics include the economic consequences of AF; cardioversion and cardiac implantable electronic devices in AF management; education of the AF patient and discharge planning; and quality metrics in AF. The book also provides order sheets and process criteria with which institutions can successfully manage the AF patient in the short stay unit, thus optimizing patient outcomes, patient satisfaction, and operational efficiencies. Short Stay Management of Atrial Fibrillation is a valuable resource for cardiologists, emergency medicine physicians, electrophysiologists, and other healthcare professionals involved in AF management.

Contents:	Part I. Impact of the Disease – 1. Atrial Fibrillation: Epidemiology and Demographics – 2. Pathophysiology of Atrial Fibrillation and Clinical Correlations – 3. The Economic Impact of Atrial Fibrillation in the US – Part II. Presentation and Management – 4. Emergency Medical Services and Atrial Fibrillation – 5. Symptoms of Atrial Fibrillation – 6. Stroke and Other Complications of Atrial Fibrillation – 7. Rate Control in Atrial Fibrillation – 8. Diagnostic Testing in the Emergency Department of Atrial Fibrillation – 9. Anticoagulation for Atrial Fibrillation in the Emergency Department or Observation Unit – 10. Cardioversion and Acute Atrial Fibrillation Management – 11. Procedural Sedation for Atrial Fibrillation Patients – 12. Risk Stratification in Atrial Fibrillation and Observation Unit Entry – 13. Cardiac Implantable Electronic Devices in the Short Stay Management of Atrial Fibrillation – 14. Pitfalls in the Acute Management of Atrial Fibrillation – Part III. Transition to the Outpatient Environment – 15. Education of the Atrial Fibrillation Patient in the Observation Unit – 16. Discharge Criteria – 17. Discharge Planning – 18. Outpatient Medications in Atrial Fibrillation – Part IV. Systems Management – 19. Atrial Fibrillation Accreditation – 20. Quality Metrics in Atrial Fibrillation – 21. Atrial Fibrillation Research in the Observation Unit and the Emergency Department – 22. Atrial Fibrillation Protocols.
