Kidney--Biopsy

Specialty: Diagnostic Imaging

Abstract: An ultrasound guided percutaneous kidney biopsy is used to diagnose abnormal kidney tissue. How to get ready for a kidney biopsy, and what happens during and after the biopsy, is covered. Risks, follow up care, and symptoms requiring a visit to your family doctor or to the Emergency Department are outlined. A list of medications and how long to stop taking them both before and after the biopsy is provided.

Responsibility: Prepared by: Interventional Radiology Provincial Committee
