Biopsy, Needle

**Subjects (LCSH):** Kidney--Diseases--Diagnosis  
Kidney--Biopsy

**Specialty:** Diagnostic Imaging

**Abstract:** An ultrasound guided percutaneous kidney biopsy is used to diagnose abnormal kidney tissue. How to get ready for a kidney biopsy, and what happens during and after the biopsy, is covered. Risks, follow up care, and symptoms requiring a visit to your family doctor or to the Emergency Department are outlined. A list of medications and how long to stop taking them both before and after the biopsy is provided.

**Responsibility:** Prepared by: Interventional Radiology Provincial Committee

**Pamphlet Number:** 0383
