Author: Bonsib, Stephen M

Responsibility: Stephen M. Bonsib

Place of Publication: New York, NY

Publisher: Springer

Date of Publication: c2013

Physical Description: 1 online resource (xvi, 266 p. : 746 ill., 677 ill. in color)

Series Title: Atlas of anatomic pathology

ISBN: 9781461471509

Subjects (MeSH): Kidney Diseases - pathology - Atlases

Subjects (LCSH): Nephrology
Pathology

Abstract: The kidney is an organ with complex organogenesis susceptible to numerous misadventures in development and is exposed to a diverse array of insults of hematogenous and lower urinary tract origin. This Atlas of Medical Renal Pathology provides an overview of the development, macroscopic and microscopic features of the normal kidney. This is followed by a comprehensive survey of developmental and cystic kidney diseases, vascular diseases and tubulointerstitial diseases. An emphasis is placed on gross diagnostic findings with detailed histological correlates. In addition, the histological, immunofluorescent, immunohistochemical and ultrastructural features of the major glomerular diseases and renal transplantation pathology are presented. This compendium of non-neoplastic kidney diseases illustrates the vast majority diseases you are likely to encounter in surgical and autopsy pathology.

Contents: 1. Embryology and Normal Kidney Structure – 2. Developmental Anomalies and Cystic Kidney Diseases – 3. Tubulointerstitial Diseases - - 4. Renal Vascular Diseases – 5. Renal Transplantation – 6. Glomerular Diseases.
