Physical Description: 1 electronic document : digital, PDF file

Subjects (MeSH): Biopsy
Kidney Diseases - diagnosis

Subjects (LCSH): Biopsy
Kidneys--Diseases--Diagnosis

Abstract: When the kidneys are affected by some diseases, they do not work properly and can cause illness. The blood work, urine tests, and other tests such as ultrasound and renal scan can give the doctor a lot of information, but sometimes this is not enough to make the diagnosis, and a kidney biopsy is needed. From the biopsy the doctors can learn what is causing the symptoms and if treatment is required. If treatment is required, the biopsy also allows the doctor to give some idea about how serious the problem is and what can be expected in the future.

Subjects (MeSH): Kidney Diseases
Nephrology - methods

Subjects (LCSH):	Nephrology Kidneys - Diseases - Diagnosis Kidneys - Diseases - Treatment Médecine
Abstract:	<p>This book will provide readers with a practice-based approach to all aspects of clinical nephrology. Written by experts in the field, Practical Nephrology offers invaluable practical advice on how to manage specific illnesses and, uniquely, the importance of establishing systems and processes to improve patient safety, enhance the patient pathway and guidance on how to systematically improve clinical governance. A unique aspect of this book are the tips and tricks and, suggestions for avoiding common errors based on the vast experience of the authors. In addition, the Editor has collated a list of links to international registries and guidelines as well as selected disease specific organisations, providing both clinicians and patients with access to helpful and recommended resources. Designed and written in a user-friendly fashion, Practical Nephrology will be the definitive reference for practising nephrologists, trainees and non-nephrologist who encounter renal patients in their daily practice.</p>

Contents:	<p>Assessment of the Renal Patient – Urine Analysis – Imaging in Nephrology – Kidney Biopsy – Acute Kidney Injury: Epidemiology and Assessment – Acute Kidney Injury: Management and Prevention – Acute Renal Replacement Therapy – Hepatorenal Syndrome – Common Electrolyte Disorders – Acid-Base Disorders – Diagnosis and Investigation of the Hypertensive Patient – Management of High Blood Pressure – Podocytopathies – Management of the Nephrotic Patient: The Overall Approach to the Patient with Nephrotic Syndrome (NS) – Management of the Nephrotic Patient: Treatment of ECF Volume Expansion Due to Nephrotic Syndrome in Adults – Minimal Change Disease and Focal Segmental Glomerulosclerosis – Membranous Nephropathy – Membranoproliferative Glomerulonephritis and C3 Glomerulopathy – IgA Nephropathy and Henoch-Schonlein Purpura – Systemic Small Vessel Vasculitis – Goodpasture's or Anti-glomerular Basement Membrane (GBM) Disease – Systemic Lupus Erythematosus, Antiphospholipid Syndrome and the Kidney – Practical Immunosuppression Guidelines for Patients with Glomerulonephritis – Infectious Diseases and the Kidney – Blood-Borne Viruses and the Kidney – Tubulointerstitial Nephritis – Rheumatological Conditions and the Kidney – Multiple Myeloma and the Kidney – Amyloidosis – Thrombotic Microangiopathies – Sickle Cell Disease and Other Haematological Disorders Involving the Kidney – Diabetes and the Kidney – Pregnancy and the Kidney – Disease of the Renal Vessels – Urinary Tract Infection – Renal Stone Disease – Congenital Anomalies of the Kidneys and Urinary Tract – Acquired Urinary Tract Obstruction – Kidney Cancer – Inherited Renal Tumour Syndromes – Polycystic Kidney Disease – Other Cystic Kidney Diseases – Genetic Disorders of the Glomerular Basement Membrane – Anderson-Fabry Disease and Other Inherited Lipid Disorders of the Kidney – Inherited Metabolic Disease – Dermatology in Kidney Disease – Chronic Kidney Disease: Epidemiology and Causes – Chronic Kidney Disease: Management – Transition – Anaemia Management in Chronic Kidney Disease – Chronic Kidney Disease: Mineral and Bone Disorder (CKD-MBD) – Chronic Kidney Disease: Cardiovascular Complications – Coagulation in Kidney Disease – Symptom Control and Palliative Care in Advanced CKD – Nutrition and Kidney Disease – Pharmacology and the Kidney – Prevention of Infection in Kidney Patients – Setting Up and Running a Haemodialysis Service – Vascular Access: Improving Outcomes for Haemodialysis Patients – Vascular Access: Fistulae and Grafts – Complications of Maintenance Haemodialysis and How to Avoid Them – Providing a Peritoneal Dialysis Service – Peritoneal Dialysis Prescription – Complications of Peritoneal Dialysis and How to Avoid Them – Assessment of the Potential Transplant Donor – Assessment of the Potential Transplant Recipient – Tissue Typing, Crossmatch and Antibody Incompatibility in Kidney Transplantation – Surgical Aspects of Kidney and Pancreas Transplantation – Management of the Acute Transplant – Immunosuppression for Kidney Transplantation – Infectious Complications of Transplantation – Long-Term Management of Kidney Transplant Recipients (KTRs) – International Health Partnerships.</p>
